PICK KITCHEN CABINETS YOU CAN TRUST!

**DRAWER:**
We load drawers at 15 pounds per square foot and operate them through 25,000 cycles, representing 20 years of regular use.

**DOOR:**
We load a cabinet door with 65 pounds, cycle through open and close 10 times and inspect for visible signs of looseness.

**STRUCTURAL:**
These tests verify the integrity and strength of the cabinets. We load wall-mounted cabinets to 600 pounds and look for structural failure.

**WHY?**
To earn the KCMA Certified Seal, kitchen cabinets must be put through a series of 15 tests. During these tests, cabinets are checked for structural strength and finish quality. The cabinet box as well as drawers and doors are tested throughout the process.

**FINISH:**
We expose the finish to vinegar, lemon, orange and grape juices, tomato ketchup, coffee, olive oil, 100-proof alcohol, mustard, and to long periods of exposure to a detergent and water solution.
